**FDV-15K Flow Divider Valve** The new Advanced Pressure Systems Flow Divider Valve (FDV) is for applications where two dump style guns are to be operated from one pump. The FDV will maintain full pressure to either gun when the other gun is dumping. When both guns are operating, the flow and pressure will be unaffected. These valves are made with rugged construction and easy to set up. The only wear part is a cartridge which can be quickly changed in the field.
